

n-Tier Launches New GreenMail Service

Electronic service allows companies of all sizes to go green replacing physical mail with secure electronic access to letters, invoices, and other documents

NEW YORK, March 9 /PRNewswire/ -- n-Tier Financial Services, a leading provider of software solutions today announced the successful launch of a new electronic service which enables companies to eliminate physical mail replacing it with secure electronic access to letters, invoices, and other documents.

"This offering allows companies to reduce cost while also reducing their impact on the environment," said Peter S. Gargone, Founder and Managing Director of n-Tier Financial Services. "The service leverages our web portal and document distribution technology which has been used in the banking industry for years and makes it available to firms of all sizes and from across all industries with no upfront costs or investment in technology infrastructure."

The service enables firms to easily setup their clients with secure online access to their information, and provides for the automated classification and distribution of documents. Charged at a per document price which is a fraction of the cost of traditional mail the service enables firms to provide a professional quality service to their clients while also benefiting from a reduction in their own expenses.
